

New records of plant bugs from the Asian part of Russia (Heteroptera: Miridae)

N.N. Vinokurov & V.B. Golub

Vinokurov, N.N. & Golub, V.B. 2007. New records of plant bugs from the Asian part of Russia (Heteroptera: Miridae). *Zoosystematica Rossica*, **16**(1): 27-30.

Hundred and forty-six species of Miridae are recorded for the first time from various regions of Siberia and the Far East of Russia.

Data on distribution of species of Miridae in Siberia and the Far East of Russia are contained in numerous publications and are summarized by Aukema & Rieger (1999). Preparation of the Catalogue of Heteroptera of the Asian part of Russia (Vinokurov et al., 2006) revealed many new records for administrative subdivisions or their parts. The paper contains new data on distribution of 146 species of Miridae in different regions of Siberia and the Far East of Russia.

The following abbreviations are used for the names of administrative subdivisions in Siberia and the Far East of Russia: Alt – Altai Terr., Bur – Republic of Buryatia, Cht – Chita Prov., JAP – Jewish Autonomous Prov., Irk – Irkutsk Prov., Kem – Kemerovo Prov., Kha – Republic of

Khakasia, Khb – Khabarovsk Terr., KhM – Khanty-Mansi Autonomous Distr., Kr – Krasnoyarsk Terr. (KrN, KrSb, KrM, KrS – northern, subboreal, middle and southern parts, respectively; see Fig. 1), Kur – Kurgan Prov., Nov – Novosibirsk Prov., Om – Omsk Prov., Prm – Primorsk Terr., RAI – Republic of Altai, Tom – Tomsk Prov., Tu – Republic of Tuva, Tyu – Tyumen Prov., Yak – Yakutia, or Sakha Republic (YakC, YakNW, YakNE – central, north-western and north-eastern Yakutia, respectively; see Fig. 2), YaN – Yamal-Nenets Autonomous Distr.

Names of depositories of the material examined are abbreviated as follows: IBPC – Institute for Biological Problems of Cryolithozone, Yakutsk; IPEE – Institute for Problems of Evolution and Ecology, Moscow; ISU – Irkutsk State University; SIFIBP – Siberian Institute of Physiology and Biochemistry of Plants, Irkutsk; SZM – Siberian Zoological Museum of the Institute of Systematics and Ecology of Animals, Novosibirsk. All other material cited here is kept at Zoological Institute, St. Petersburg.
